

16<sup>TH</sup> ANNUAL INTERNATIONAL ABOVEGROUND STORAGE TANK CONFERENCE & TRADE SHOW  
ROSEN SHINGLE CREEK HOTEL | ORLANDO, FLORIDA

NISTM CO-LOCATED EVENT:  
**EPA SPCC & FRP SHORT COURSE**  
April 22, 2014

**EPA SPCC & FRP AGENDA**

<p><b>8:00am – 12:00pm</b></p> <p>The purpose of the Spill Prevention, Control, and Countermeasure (SPCC) rule is to help facilities prevent a discharge of oil into navigable waters or adjoining shorelines. This rule is part of the U.S. Environmental Protection Agency's oil spill prevention program and was published under the authority of Section 311(j)(1)(C) of the Federal Water Pollution Control Act (Clean Water Act) in 1974. The rule may be found at Title 40, Code of Federal Regulations, Part 112.</p> <p>A facility is covered by the SPCC rule if it has an aggregate aboveground oil storage capacity greater than 1,320 U.S. gallons or a completely buried storage capacity greater than 42,000 U.S. gallons and there is a reasonable expectation of an oil discharge into or upon navigable waters of the U.S. or adjoining shorelines.</p>	<p><b>NEW MATERIAL: Spill Prevention Control and Countermeasure (SPCC) Overview of the Guidance Document for Regional Inspectors</b> <i>Mark Howard, U.S. EPA, Office of Emergency Management</i></p> <p>In August 2013, EPA revised the <a href="#">SPCC Guidance for Regional Inspectors</a>, which was originally issued on December 2, 2005. The Guidance is designed to assist EPA inspectors in implementing the SPCC rule requirements, understanding SPCC applicability, and to help clarify the role of the inspector in reviewing a facility's implementation of the performance-based provisions of the rule. The guidance, designed to facilitate nationally consistent implementation and interpretation of the SPCC Rule, is also available to owners and operators of facilities that may be subject to the requirements of the SPCC rule, and to the general public on how EPA intends the SPCC rule to be implemented.</p> <p>The revised Guidance contains seven main chapters of the guidance and supporting documents in Appendices B–<i>Select Regulations</i>, C–<i>Summary of Revised Rule Provisions</i>, and H–<i>Other Policy Documents</i>.</p> <p><b>Short Course</b> The short course is available for all SPCC stakeholders. This short course will provide an overview of the revisions to the <i>SPCC Guidance for Regional Inspectors</i> document. The session will be approximately four hours long, including time to address questions. The intended audience for these outreach sessions are stakeholders in the SPCC regulated community, which include, but are not limited to, Professional Engineers (PE) and facility owners who maintain SPCC Plans or will be updating SPCC Plans. This presentation is the same presentation provided to EPA inspectors on the implications of the new guidance document.</p>
	<p><b>LUNCH BREAK</b></p>
<p><b>1:00pm – 5:00pm</b></p> <p>In 1994, EPA finalized the Facility Response Plan regulation at 40 CFR Part 112.20 and 112.21. Promulgated under the authority of the Oil Pollution Act of 1990, the regulation requires certain facilities that pose the risk of substantial harm to the environment to prepare plans to respond to a worst case discharge of oil. FRP-regulated facilities must develop and submit a plan to their EPA Regional Administrator. EPA reviews and approves FRPs for certain facilities that have the potential to cause significant and substantial harm. There are over 4,400 FRP plan holders in the U.S.</p>	<p><b>Plan requirements for Facilities Covered by EPA's Facility Response Plan (FRP) Regulation</b> <i>Troy Swackhammer, U.S. EPA, Office of Emergency Management</i></p> <p>This presentation describes the requirements and expectations for the FRP plan holders.</p> <p>This four hour short course will cover:</p> <ul style="list-style-type: none"><li>• Introduction and purpose of the FRP regulation</li><li>• Plan requirements under §112.20 and Appendix F Relationship of the FRP to the National Contingency Plan, Area Contingency Plans, and other preparedness activities conducted by industry, USEPA, and USCG</li><li>• Steps in planning and implementing an FRP, including PREP requirements (drills and exercises)</li><li>• Common problems observed and recommendations for improvement of plans and exercises</li></ul>

National Institute For Storage Tank Management

16<sup>TH</sup> ANNUAL INTERNATIONAL ABOVEGROUND STORAGE TANK CONFERENCE & TRADE SHOW  
ROSEN SHINGLE CREEK HOTEL | ORLANDO, FLORIDA

## REGISTRATION FORM

### FREE EPA SPCC CLASS | TRADE SHOW

#### EPA SPCC & FRP CLASSES
