

16TH ANNUAL INTERNATIONAL ABOVEGROUND STORAGE TANK CONFERENCE & TRADE SHOW
ROSEN SHINGLE CREEK HOTEL | ORLANDO, FLORIDA

NISTM CO-LOCATED EVENT:
TANKS 101

Orlando, FL | April 22, 2014

NISTM offering this unique aboveground storage tank course taught by industry authority **Philip Myers** of **PEMY Consulting**.

This comprehensive course is aimed at engineers, inspectors, regulators, administrators, and managers responsible for storage tank facilities who wish to improve their overall knowledge and understanding of these facilities in the petroleum, chemical, aviation and paper and pulp industries. More importantly, this course offers an excellent opportunity to network with others in the same situation and ask questions and consult with experts. The course is divided into two major parts.

PART 1:

TANK FACILITIES AND TANK DESIGN | 8:30AM – 12:00PM

Covers the fundamentals for the design, construction, operation, maintenance, and inspection of terminal and tank facilities. This segment will focus on an overview of aboveground petroleum storage tanks, the different kinds of designs, and the general considerations associated with storage tanks such as fire safety. It will cover how the tank designs and components affect operability as well as operating risk. The morning segment will focus on the contents of API 650 and API 620 and explain how to specify tanks. We will also cover how and why various tank options and designs are used in the context of different requirements and situations.

PART 2:

TANK INSPECTION AND INTEGRITY | 1:00PM – 4:30PM

Having built a good tank the next problem is to ensure it remains safe and leak free. The focus of this segment is on the tank inspection. The rules of API 653 will be covered and the contents of API 653, and API 575 will be explained in detail. Some topics are how suitability for service is determined, brittle fracture, evaluation of fixed roofs, floating roofs, foundations, when and how to use of release prevention barriers, principles of hydrostatic tests, materials of construction, and many other issues associated with existing tanks.
