

CORROSION FUNDAMENTALS

½ DAY COURSE 1:00pm – 5:00pm

Preceding the 14th Annual
National Aboveground Storage
Tank Conference & Trade Show

NISTM
National Institute for Storage Tank Management

Nov 30, 2021 • The Woodlands, Texas

NEW HIRE?

NEW IN THE STORAGE TANK INDUSTRY?

WANT TO ADD TO YOUR KNOWLEDGE BASE?

AMPP (formerly NACE) will be delivering a half-day **Corrosion Fundamentals Course** in-person from 1:00 pm till 5:00 pm on **November 30, 2021**. This co-located will be held at NISTM's 14th Annual Aboveground Storage Tank Conference & Trade Show in The Woodlands, Texas.

This fundamental course is ideal for new hires that are fresh in the storage tank industry. It's also good for those who want to freshen up their knowledge base on corrosion control, prevention, anodes, cathodic protection, and so much more!

Led by industry expert Lou Koszewski, this course will introduce practitioners to the common types of corrosion, methods of control, and how corrosion presents itself in storage tanks.

- Identify common corrosion failures and explain how corrosion occurs
- Gain insight into the forms of corrosion in storage tanks such as general, localized, crevice, pitting, galvanic, environmental, SCC, HIC, etc.
- Common corrosion control and mitigation methods such as cathodic protection, protective coatings, corrosion inhibitors, etc.
- Proven detection methods to locate corrosion in tanks: Inspection methods, monitoring, probes, and more

Don't miss out on registering for this course!

Already a corrosion expert? Help AMPP build corrosion awareness across industries by sharing with a colleague!

Registration fee is \$225 per person
